- In LOW gear before the start, press the A Button to warm up the engine to achieve maximum torque at the start, and begin the race smoothly.
- Start the race in time with the signal.

- In each course, complete the 1st lap before the timer reaches 0 to reset the timer and enter the 2nd lap. Further, completing the 2nd lap before the timer reaches 0 will allow you to challenge the next course.
- Colliding with other cars or hitting off-course poles or billboards will cause your car to flame out, temporarily disabling it.
- Riding up on the side of the racetrack will drop your speed.

## Rules

- Each course has a different value set for its timer. If you don't complete a lap before the timer reaches 0, the car will stop and the distance travelled will become the final score.

- If 2 laps are completed on each course, the next course can be challenged.
- Each LEVEL ends with course #5. Each consecutive time is shorter than the last. See how far you can drive and try for the high score.

## Techniques

- After the start, stay in LOW gear until the tachometer just reaches the yellow zone, then switch into HIGH gear to further increase speed.
- When restarting following a collision, staying in LOW gear will recover speed more quickly.
